

Botox® (onabotulinumtoxinA)

(Intramuscular/Intradetrusor/Intradermal)

Document Number: IC-0238

Last Review Date: 05/03/2021 Date of Origin: 06/21/2011

Dates Reviewed: 09/2011, 12/2011, 03/2012, 06/2012, 09/2012, 12/2012, 02/2013, 03/2013, 06/2013, 09/2013, 12/2013, 03/2014, 03/2015, 06/2015, 09/2015, 12/2015, 03/2016, 06/2016, 09/2016, 12/2016, 03/2017, 06/2017, 09/2017, 12/2017, 03/2018, 06/2018, 10/2018, 04/2019, 07/2019, 09/2019, 12/2019, 01/2020, 05/2020, 08/2020, 03/2021, 05/2021

I. Length of Authorization

- Coverage will be provided for six months and may be renewed.
- Preoperative use in Ventral Hernia may NOT be renewed.

II. Dosing Limits

A. Quantity Limit (max daily dose) [NDC Unit]:

- Botox 50 unit powder for injection: 1 vial per 84 days
- Botox 100 unit powder for injection: 1 vial per 84 days
- Botox 100 unit powder for injection: 5 vials once (for Ventral Hernia only)
- Botox 200 unit powder for injection: 2 vials per 84 days

B. Max Units (per dose and over time) [HCPCS Unit]:

Indication	Billable Units	Per # days
Blepharospasm	200	84
Cervical Dystonia	300	84
Strabismus	100	84
Esophageal Achalasia	100	168
Adult Upper Limb Spasticity	400	84
Adult Lower Limb Spasticity	400	84
Chronic Migraine	200	84
Severe Primary Axillary Hyperhidrosis	100	112
Sialorrhea	100	84
Neurogenic Bladder/Detrusor Overactivity	200	84
Overactive Bladder	100	84
Chronic Anal Fissures	100	84
Palmar Hyperhidrosis	200	168
Pediatric Upper Limb Spasticity	300	84
Pediatric Lower Limb Spasticity	300	84
Laryngeal Dystonia	100	84
Hemifacial Spasms	100	84

Oromandibular Dystonia	200	84
Ventral Hernia	500	N/A
All other indications	400	84

III. Initial Approval Criteria ¹

Coverage is provided in the following conditions:

Patient is at least 18 years of age (unless otherwise specified); AND

Universal Criteria

- Patient evaluated for any disorders which may contribute to respiratory or swallowing difficulty; AND
- Patient does not have a hypersensitivity to any botulinum toxin product; AND
- Patient does not have an active infection at the proposed injection site; AND
- Patient is not on concurrent treatment with another botulinum toxin (i.e., abobotulinumtoxinA, incobotulinumtoxinA, rimabotulinumtoxinB, etc.); **AND**

Blepharospasms $\dagger \Phi^1$

• Patient is at least 12 years of age

Cervical Dystonia † Φ 1

- Patient is at least 16 years of age; AND
- Patient has a history of recurrent involuntary contraction of one or more muscles in the neck; AND
 - Patient has sustained head tilt; OR
 - Patient has abnormal posturing with limited range of motion in the neck

Strabismus † Φ 1

• Patient is at least 12 years of age

Spastic Conditions 1,8-14, 22,23,24,25,26,46

- Patient has one of the following:
 - Upper/Lower Limb spasticity in adults (i.e., used post-stroke for spasms) †
 - \circ Pediatric upper limb spasticity in patients aged 2 years or greater (i.e., used post-stroke for spasms or for spasms related to cerebral palsy) $\dagger \Phi$
 - O Pediatric lower limb spasticity in patients aged 2 years or greater †
 - Spasticity due to multiple sclerosis or Schilder's disease ‡
 - Acquired spasticity secondary to spinal cord or brain injuries ‡
 - Spastic Plegic conditions including Monoplegia, Diplegia, Hemiplegia, Paraplegia
 (including Hereditary spastic paraplegia) and Quadriplegia ‡

O Hemifacial Spasm ‡ 26,32,33,49-51

Severe Primary Axillary Hyperhidrosis † 1,15,52,59

- Patient has tried and failed ≥ 1 month trial of a topical agent (i.e., aluminum chloride, glycopyrronium, etc.); AND
 - Patient has a history of medical complications such as skin infections or significant functional impairments; **OR**
 - o Patient has had a significant burden of disease or impact to activities of daily living due to condition (e.g., impairment in work performance/productivity, frequent change of clothing, difficulty in relationships and/or social gatherings, etc.)

Prophylaxis for Chronic Migraines † 1,6,7,53,54,56,58

- Not used in combination with prophylactic calcitonin gene-related peptide (CGRP) inhibitors (i.e., eptinezumab, erenumab, galcanezumab, fremanezumab, etc.) [NOTE: This does not include CGRP inhibitors used for acute treatment (i.e., ubrogepant)]; AND
- Patient is utilizing prophylactic intervention modalities (i.e., pharmacotherapy, behavioral therapy, physical therapy, etc.); **AND**
- Patient has 15 or more headache (tension-type-like and/or migraine-like) days per month for at least 3 months; AND
 - Patient has had at least five attacks with features consistent with migraine (with and/or without aura)§; AND
 - On at least 8 days per month for at least 3 months:
 - Headaches have characteristics and symptoms consistent with migraine§; OR
 - Patient suspected migraines are relieved by a triptan or ergot derivative medication;
 AND
- Patient has failed at least an 8-week trial of any two oral medications for the prevention of migraines (see list of migraine-prophylactic medications below for examples)

Esophageal Achalasia ‡ 2-5,68

- Patient is at high risk of complication from pneumatic dilation, surgical myotomy or peroral endoscopic myotomy (POEM); **OR**
- Patient has had treatment failure with pneumatic dilation, surgical myotomy, or POEM;
 OR
- Patient has had perforation from pneumatic dilation; OR
- Patient has an epiphrenic diverticulum or hiatal hernia; **OR**
- Patient has esophageal varices

Focal Dystonias ‡ 22-26,34-41

- Focal upper limb dystonia
 - o Patient has functional impairment; **OR**

- o Patient has pain as a result
- Laryngeal dystonia
- Oromandibular dystonia
 - o Patient has functional impairment; **OR**
 - o Patient has pain as a result

Sialorrhea associated with neurological disorders ‡ 15-20,42,43

- Patient has a history of troublesome sialorrhea for at least a 3 month period; AND
 - o Patient has Parkinson's disease; OR
 - o Patient has severe developmental delays; OR
 - o Patient has cerebral palsy; **OR**
 - Patient has amyotrophic lateral sclerosis

Incontinence due to detrusor overactivity † 1,55,64,67

- Patient is at least 5 years of age; AND
- Patient does not have a current, untreated urinary tract infection; AND
- Patient has detrusor overactivity associated with a neurologic condition (i.e., spinal cord injury, multiple sclerosis, etc.) that is confirmed by urodynamic testing; **AND**
- Patient has failed a 1 month or longer trial of **two** medications from either the antimuscarinic (i.e., darifenacin, fesoterodine, oxybutynin, solifenacin, tolterodine or trospium) or beta-adrenergic (i.e., mirabegron) classes

Overactive Bladder (OAB) † 1,55

- Patient does not have a current, untreated urinary tract infection; AND
- Patient has symptoms of urge urinary incontinence, urgency, and frequency; AND
- Patient has failed a 1 month or longer trial of **two** medications from either the antimuscarinic (i.e., darifenacin, fesoterodine, oxybutynin, solifenacin, tolterodine or trospium) and/or beta-adrenergic (i.e., mirabegron) classes

Severe Palmar Hyperhidrosis ‡ 15,21,52

- Patient has tried and failed ≥ 1 month trial of a topical agent (i.e., aluminum chloride, etc.);
 AND
- Patient has failed with iontophoresis; AND
 - Patient has a history of medical complications such as skin infections or significant functional impairments; OR
 - o Patient has had a significant impact to activities of daily living due to condition

Chronic Anal Fissure ‡ 27-31,47,61-63

Other causes of disease have been ruled out (i.e., Crohn's Disease, etc.); AND

- Patient has failed on non-pharmacologic supportive measures (i.e., sitz baths, psyllium fiber, bulking agents, etc.);
- Patient has tried and failed a ≥ 1 month trial of conventional pharmacologic therapy (i.e. oral/topical nifedipine, diltiazem, and/or topical nitroglycerin, bethanechol, etc.)

Ventral Hernia ‡ 65,66

- Patient has a large ventral hernia with loss of domain or contaminated ventral hernia;
 AND
- Used preoperatively in patients scheduled to receive abdominal wall reconstruction (AWR)
- † FDA Approved Indication; ‡ Literature Supported Indication; ♠ Orphan Drug

Migraine-Prophylaxis Oral Medications (list not all-inclusive)

- Antidepressants (e.g., amitriptyline, fluoxetine, nortriptyline, etc.)
- Beta blockers (e.g., propranolol, metoprolol, nadolol, timolol, atenolol, pindolol etc.)
- Angiotensin converting enzyme inhibitors/angiotensin II receptor blockers (ex. lisinopril, candesartan, etc.)
- Anti-epileptics (e.g., divalproex, valproate, topiramate, etc.)
- Calcium channels blockers (e.g., verapamil, etc.)

Migraine Features § 53

Migraine without aura

- At least five attacks have the following:
 - Headache attacks lasting 4-72 hours (untreated or unsuccessfully treated)
 - o Headache has at least two of the following characteristics:
 - Unilateral location
 - Pulsating quality
 - Moderate or severe pain intensity
 - Aggravation by or causing avoidance of routine physical activity (e.g., walking or climbing stairs); AND
 - o During headache at least one of the following:
 - Nausea and/or vomiting
 - Photophobia and phonophobia

Migraine with aura

- At least two attacks have the following:
 - One or more of the following fully reversible aura symptoms:
 - Visual
 - Sensory
 - Speech and/or language
 - Motor
 - Brainstem
 - Retinal; AND
 - At least three of the following characteristics:
 - At least one aura symptom spreads gradually over ≥5 minutes
 - Two or more symptoms occur in succession
 - Each individual aura symptom lasts 5 to 60 minutes
 - At least one aura symptom is unilateral
 - At least one aura symptom is positive (e.g., scintillations and pins and needles)
 - The aura is accompanied, or followed within 60 minutes, by headache

IV. Renewal Criteria 1-66

Coverage can be renewed based upon the following criteria:

- Patient continues to meet universal and indication specific criteria as identified in section III; AND
- Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: symptoms of a toxin spread effect (i.e., asthenia, generalized muscle weakness, diplopia, ptosis, dysphagia, dysphonia, dysarthria, urinary incontinence, swallowing/breathing difficulties, etc.), severe hypersensitivity reactions, severe pulmonary effects (i.e., reduced pulmonary function), corneal exposure/ulceration, retrobulbar hemorrhage, bronchitis/upper-respiratory tract infections, autonomic dysreflexia, urinary tract infection, and urinary retention, etc.; AND
- Disease response as evidenced by the following:

Blepharospasms

Improvement of severity and/or frequency of eyelid spasms

Cervical dystonia

- Improvement in the severity and frequency of pain; AND
- Improvement of abnormal head positioning

Strabismus

Improvement in alignment of prism diopters compared to pre-treatment baseline

Focal Upper/Lower Limb Spasticity

• Decrease in tone and/or resistance, of affected areas, based on a validated measuring tool (i.e., Ashworth Scale, Physician Global Assessment, Clinical Global Impression (CGI), etc.)

Hemifacial Spasms

 Decrease in frequency and/or severity of spasm, or a decrease in tone and/or improvement in asymmetry to the affected side of the face

Severe primary axillary hyperhidrosis

- Significant reduction in spontaneous axillary sweat production; AND
- Patient has a significant improvement in activities of daily living

Prophylaxis for chronic migraines

- Significant decrease in the number, frequency, and/or intensity of headaches; AND
- Improvement in function; AND
- Patient continues to utilize prophylactic intervention modalities (i.e., pharmacotherapy, behavioral therapy, physical therapy, etc.)

Esophageal achalasia

Improvement and/or relief in symptoms (i.e., dysphagia, pain, etc.); OR

• Improvement in esophageal emptying as evidenced by functional testing

Focal Dystonias

- Focal upper limb dystonia
 - o Improvement in pain and/or function
- Laryngeal dystonia
 - o Improvement in voice function or quality
- Oromandibular dystonia
 - o Improvement in pain and function

Sialorrhea associated with neurological disorders

Significant decrease in saliva production

Incontinence due to detrusor overactivity

- Patient does not have a current, untreated urinary tract infection; AND
- Significant improvements in weekly frequency of incontinence episodes; AND
- Patient's post-void residual (PVR) periodically assessed as medically appropriate

Overactive bladder (OAB)

- Patient does not have a current, untreated urinary tract infection; AND
- Significant improvement in daily frequency of urinary incontinence or micturition episodes and/or volume voided per micturition; AND
- Patient's post-void residual (PVR) periodically assessed as medically appropriate

Severe Palmar Hyperhidrosis

- Significant reduction in spontaneous palmar sweat production; AND
- Patient has a significant improvement in activities of daily living

Chronic anal fissure

- Complete healing of anal fissure; **OR**
- Symptomatic improvement of persistent fissures

Spastic Conditions, Other (Plegias, etc.)

• Decrease in tone and/or resistance, of affected areas, based on a validated measuring tool (i.e., Ashworth Scale, Physician Global Assessment, Clinical Global Impression (CGI), etc.)

Ventral Hernia

May not be renewed

V. Dosage/Administration 1,2,10,15,21,25,27-30,32,38,50,52,65

Indication	Dose
Blepharospasm	1.25-2.5 Units (0.05—0.1 ml per site) injected into each of 3 sites per affected eye every three months. There appears to be little benefit obtainable from injecting more than 5 Units per site. The effect of treatment lasts an average of 12 weeks. Cumulative dose in 30 days should not exceed 200 units
Cervical Dystonia	198 Units to 300 Units divided among the affected muscles. No more than 50 Units per site. May re-treat in 12 weeks.
Strabismus	Based on muscle(s) affected, 1.25-2.5 Units in any one muscle initially. Subsequent doses may be increased up to two-fold compared to previously administered dose. No more than 25 Units in any one muscle for recurrent cases. The effect of treatment usually lasts about 12 weeks.
Esophageal Achalasia	100 Units (20-25 Units per quadrant) per administration, dose may be repeated in 6 months (24 weeks)
Upper Limb Spasticity	Dosing in initial and sequential treatment sessions should be tailored to the individual based on the size, number and location of muscles involved, severity of spasticity, the presence of local muscle weakness, the patient's response to previous treatment, or adverse event history with Botox. For pediatrics, localization of the involved muscles with techniques such as needle electromyographic guidance, nerve stimulation, or ultrasound is recommended. Adults In clinical trials, doses ranging from 75 Units to 400 Units were divided among selected muscles at a given treatment session, no sooner than every 12 weeks. Pediatrics The recommended dose for treating pediatric upper limb spasticity is 3 Units/kg to 6 Units/kg divided among the affected muscles. The total dose of Botox administered per treatment session in the upper limb should not exceed 6 Units/kg or 200 Units, whichever is lower. The maximum cumulative dose should not exceed the lower of 10 Units/kg body weight or 340 Units, in a 3-month interval.
Lower Limb Spasticity	Adults - 300 to 400 Units divided among 5 muscle groups (gastrocnemius, soleus, tibialis posterior, flexor hallucis longus, and flexor digitorum longus), no sooner than every 12 weeks. Pediatrics - The recommended dose for treating pediatric lower limb spasticity is 4 Units/kg to 8 Units/kg divided among the affected muscles. The total dose of Botox administered per treatment session in the lower limb should not exceed 8 Units/kg or 300 Units, whichever is lower. The maximum cumulative dose should not exceed the lower of 10 Units/kg body weight or 340 Units, in a 3-month interval.
Chronic Migraine	155 Units administered intramuscularly (IM) as 0.1 mL (5 Units) injections per each site. Injections should be divided across 7 specific head/neck muscle areas. The recommended re-treatment schedule is every 12 weeks.

Indication	Dose
Severe Primary	50 Units intradermally per axilla every 16 weeks
Axillary	
Hyperhidrosis	
Sialorrhea	15-40 Units in the parotid gland injected in two places and 10-15 Units in the
	submandibular glands (total dose from 50-100 Units per
	patient/administration), repeated in 3 months (12 weeks), if needed.
Neurogenic	Adults
Bladder/Detrusor Overactivity	- 200 Units per treatment injected into the detrusor muscle using 30 injections (6.7 units each).
	<u>Pediatrics</u>
	 Weight ≥ 34 kg: 200 Units per treatment injected into the detrusor muscle using 20 injections.
	– Weight < 34 kg: 6 Units/kg per treatment injected into the detrusor muscle
	using 20 injections.
	** Re-inject no sooner than 12 weeks from the prior bladder injection.
Overactive Bladder	100 Units per treatment injected into the detrusor muscle using 20 injections
(OAB)	(5 units each). Re-inject no sooner than 12 weeks from the prior bladder
	injection.
Palmar	50-100 units per hand, repeated every 6 months (24 weeks), as needed
Hyperhidrosis	
Hemifacial Spasms	Recommended dose of 20 to 40 U, divided among affected muscles.
	Retreatment within 12 weeks
Oromandibular	80 units per side (~40 units injected into both the masseter and submentalis
Dystonia	complex muscles) every 12 weeks.
Laryngeal Dystonia	Starting dose of 1.25-5 units into thyroarytenoid muscle. Dose is titrated based on response and side effects after. Retreat every 3 months (12 weeks).
Chronic Anal	Recommended doses of up to 25 units, injected into the anal sphincter. Retreat
Fissures	every 3 months (12 weeks).
Ventral Hernia	500 units divided among abdominal muscles, injected 2-4 weeks prior to AWR
	surgery. May not be renewed.
All other	Not to exceed a cumulative dose of 400 U (for one or more indications) every 12
indications (unless	weeks
otherwise specified)	

- When initiating treatment, the lowest recommended dose should be used.
- In treating adult patients for one or more indications, the maximum cumulative dose should not exceed 400 Units, in a 3-month (12-week) interval (unless used for Ventral Hernia).
- In treating pediatric patients, the total should not exceed the lower of 10 Units/kg body weight or 340 Units, in a 3-month (12-week) interval.
- Unless otherwise stated, re-treatment should occur no sooner than 12 weeks from the prior injection.

VI. Billing Code/Availability Information

HCPCS Code:

• J0585 – Injection, onabotulinumtoxinA, 1 unit; 1 billable unit = 1 unit

NDC:

- Botox 50 unit powder for injection; single-dose vial: 00023-3920-xx
- Botox 100 unit powder for injection; single-dose vial: 00023-1145-xx
- Botox 200 unit powder for injection; single-dose vial: 00023-3921-xx

Appendix 1 – Covered Diagnosis Codes

ICD-10	ICD-10 Description
G11.4	Hereditary spastic paraplegia
G24.3	Spasmodic torticollis
G24.4	Idiopathic orofacial dystonia
G24.5	Blepharospasm
G24.9	Dystonia, unspecified
G25.89	Other specified extrapyramidal and movement disorders
G35	Multiple sclerosis
G37.0	Diffuse sclerosis of central nervous system
G43.701	Chronic migraine without aura, not intractable, with status migrainosus
G43.709	Chronic migraine without aura, not intractable, without status migrainosus
G43.711	Chronic migraine without aura, intractable, with status migrainosus
G43.719	Chronic migraine without aura, intractable, without status migrainosus
G51.3	Clonic hemifacial spasm
G51.31	Clonic hemifacial spasm, right
G51.32	Clonic hemifacial spasm, left
G51.33	Clonic hemifacial spasm, bilateral
G51.39	Clonic hemifacial spasm, unspecified
G80.0	Spastic quadriplegic cerebral palsy
G80.1	Spastic diplegic cerebral palsy
G80.2	Spastic hemiplegic cerebral palsy
G80.3	Athetoid cerebral palsy
G80.4	Ataxic cerebral palsy
G80.8	Other cerebral palsy
G80.9	Cerebral palsy, unspecified
G81.10	Spastic hemiplegia affecting unspecified side
G81.11	Spastic hemiplegia affecting right dominant side
G81.12	Spastic hemiplegia affecting left dominant side
G81.13	Spastic hemiplegia affecting right nondominant side
G81.14	Spastic hemiplegia affecting left nondominant side
G82.20	Paraplegia, unspecified
G82.21	Paraplegia, complete
G82.22	Paraplegia, incomplete
G82.50	Quadriplegia, unspecified
G82.51	Quadriplegia, C1-C4 complete
G82.52	Quadriplegia, C1-C4 incomplete

ICD-10	ICD-10 Description
G82.53	Quadriplegia, C5-C7 complete
G82.54	Quadriplegia, C5-C7 incomplete
G83.0	Diplegia of upper limbs
G83.10	Monoplegia of lower limb affecting unspecified side
G83.11	Monoplegia of lower limb affecting right dominant side
G83.12	Monoplegia of lower limb affecting left dominant side
G83.13	Monoplegia of lower limb affecting right nondominant side
G83.14	Monoplegia of lower limb affecting left nondominant side
G83.20	Monoplegia of upper limb affecting unspecified side
G83.21	Monoplegia of upper limb affecting right dominant side
G83.22	Monoplegia of upper limb affecting left dominant side
G83.23	Monoplegia of upper limb affecting right nondominant side
G83.24	Monoplegia of upper limb affecting left nondominant side
G83.4	Cauda equina syndrome
H49.00	Third [oculomotor] nerve palsy, unspecified eye
H49.01	Third [oculomotor] nerve palsy, right eye
H49.02	Third [oculomotor] nerve palsy, left eye
H49.03	Third [oculomotor] nerve palsy, bilateral
H49.10	Fourth [trochlear] nerve palsy, unspecified eye
H49.11	Fourth [trochlear] nerve palsy, right eye
H49.12	Fourth [trochlear] nerve palsy, left eye
H49.13	Fourth [trochlear] nerve palsy, bilateral
H49.20	Sixth [abducent] nerve palsy, unspecified eye
H49.21	Sixth [abducent] nerve palsy, right eye
H49.22	Sixth [abducent] nerve palsy, left eye
H49.23	Sixth [abducent] nerve palsy, bilateral
H49.30	Total (external) ophthalmoplegia, unspecified eye
H49.31	Total (external) ophthalmoplegia, right eye
H49.32	Total (external) ophthalmoplegia, left eye
H49.33	Total (external) ophthalmoplegia, bilateral
H49.40	Progressive external ophthalmoplegia, unspecified eye
H49.41	Progressive external ophthalmoplegia, right eye
H49.42	Progressive external ophthalmoplegia, left eye
H49.43	Progressive external ophthalmoplegia, bilateral
H49.881	Other paralytic strabismus, right eye
H49.882	Other paralytic strabismus, left eye
H49.883	Other paralytic strabismus, bilateral
H49.889	Other paralytic strabismus, unspecified eye
H49.9	Unspecified paralytic strabismus
H50.00	Unspecified esotropia
H50.011	Monocular esotropia, right eye

ICD-10	ICD-10 Description
H50.012	Monocular esotropia, left eye
H50.021	Monocular esotropia with A pattern, right eye
H50.022	Monocular esotropia with A pattern, left eye
H50.031	Monocular esotropia with V pattern, right eye
H50.032	Monocular esotropia with V pattern, left eye
H50.041	Monocular esotropia with other noncomitancies, right eye
H50.042	Monocular esotropia with other noncomitancies, left eye
H50.05	Alternating esotropia
H50.06	Alternating esotropia with A pattern
H50.07	Alternating esotropia with V pattern
H50.08	Alternating esotropia with other noncomitancies
H50.10	Unspecified exotropia
H50.111	Monocular exotropia, right eye
H50.112	Monocular exotropia, left eye
H50.121	Monocular exotropia with A pattern, right eye
H50.122	Monocular exotropia with A pattern, left eye
H50.131	Monocular exotropia with V pattern, right eye
H50.132	Monocular exotropia with V pattern, left eye
H50.141	Monocular exotropia with other noncomitancies, right eye
H50.142	Monocular exotropia with other noncomitancies, left eye
H50.15	Alternating exotropia
H50.16	Alternating exotropia with A pattern
H50.17	Alternating exotropia with V pattern
H50.18	Alternating exotropia with other noncomitancies
H50.21	Vertical strabismus, right eye
H50.21	Vertical strabismus, right eye
H50.22	Vertical strabismus, left eye
H50.30	Unspecified intermittent heterotropia
H50.311	Intermittent monocular esotropia, right eye
H50.312	Intermittent monocular esotropia, left eye
H50.32	Intermittent alternating esotropia
H50.331	Intermittent monocular exotropia, right eye
H50.332	Intermittent monocular exotropia, left eye
H50.34	Intermittent alternating exotropia
H50.40	Unspecified heterotropia
H50.411	Cyclotropia, right eye
H50.412	Cyclotropia, left eye
H50.42	Monofixation syndrome
H50.43	Accommodative component in esotropia
H50.50	Unspecified heterophoria
H50.51	Esophoria

ICD-10	ICD-10 Description
H50.52	Exophoria
H50.53	Vertical heterophoria
H50.54	Cyclophoria
H50.55	Alternating hyperphoria
H50.60	Mechanical strabismus, unspecified
H50.611	Brown's sheath syndrome, right eye
H50.612	Brown's sheath syndrome, left eye
H50.69	Other mechanical strabismus
H50.811	Duane's syndrome, right eye
H50.812	Duane's syndrome, left eye
H50.89	Other specified strabismus
H50.9	Unspecified strabismus
H51.0	Palsy (spasm) of conjugate gaze
H51.11	Convergence insufficiency
H51.12	Convergence excess
H51.20	Internuclear ophthalmoplegia, unspecified eye
H51.21	Internuclear ophthalmoplegia, right eye
H51.22	Internuclear ophthalmoplegia, left eye
H51.23	Internuclear ophthalmoplegia, bilateral
H51.8	Other specified disorders of binocular movement
H51.9	Unspecified disorder of binocular movement
I69.031	Monoplegia of upper limb following nontraumatic subarachnoid hemorrhage affecting right dominant side
100.001	Monoplegia of upper limb following nontraumatic subarachnoid hemorrhage affecting left
I69.032	dominant side
I69.033	Monoplegia of upper limb following nontraumatic subarachnoid hemorrhage affecting right non-dominant side
109.055	Monoplegia of upper limb following nontraumatic subarachnoid hemorrhage affecting left non-
I69.034	dominant side
	Monoplegia of upper limb following nontraumatic subarachnoid hemorrhage affecting
I69.039	unspecified side Monoplegia of lower limb following nontraumatic subarachnoid hemorrhage affecting right
I69.041	dominant side
	Monoplegia of lower limb following nontraumatic subarachnoid hemorrhage affecting left
I69.042	dominant side
I69.043	Monoplegia of lower limb following nontraumatic subarachnoid hemorrhage affecting right non- dominant side
103.040	Monoplegia of lower limb following nontraumatic subarachnoid hemorrhage affecting left non-
I69.044	dominant side
T00.040	Monoplegia of lower limb following nontraumatic subarachnoid hemorrhage affecting
I69.049	unspecified side Hemiplegia and hemiparesis following nontraumatic subarachnoid hemorrhage affecting right
I69.051	dominant side
	Hemiplegia and hemiparesis following nontraumatic subarachnoid hemorrhage affecting left
I69.052	dominant side Hamiplagia and hamiparesia following pontroumatic subareal poid hamorphage affecting wight
I69.053	Hemiplegia and hemiparesis following nontraumatic subarachnoid hemorrhage affecting right non-dominant side

ICD-10	ICD-10 Description
	Hemiplegia and hemiparesis following nontraumatic subarachnoid hemorrhage affecting left
I69.054	non-dominant side
	Hemiplegia and hemiparesis following nontraumatic subarachnoid hemorrhage affecting
I69.059	unspecified side
	Monoplegia of upper limb following nontraumatic intracerebral hemorrhage affecting right
I69.131	dominant side
	Monoplegia of upper limb following nontraumatic intracerebral hemorrhage affecting left
I69.132	dominant side
	Monoplegia of upper limb following nontraumatic intracerebral hemorrhage affecting right non-
I69.133	dominant side
	Monoplegia of upper limb following nontraumatic intracerebral hemorrhage affecting left non-
I69.134	dominant side
	Monoplegia of upper limb following nontraumatic intracerebral hemorrhage affecting
I69.139	unspecified site
	Monoplegia of lower limb following nontraumatic intracerebral hemorrhage affecting right
I69.141	dominant side
	Monoplegia of lower limb following nontraumatic intracerebral hemorrhage affecting left
I69.142	dominant side
	Monoplegia of lower limb following nontraumatic intracerebral hemorrhage affecting right non-
I69.143	dominant side
	Monoplegia of lower limb following nontraumatic intracerebral hemorrhage affecting left non-
I69.144	dominant side
	Monoplegia of lower limb following nontraumatic intracerebral hemorrhage affecting
I69.149	unspecified site
	Hemiplegia and hemiparesis following nontraumatic intracerebral hemorrhage affecting right
I69.151	dominant side
	Hemiplegia and hemiparesis following nontraumatic intracerebral hemorrhage affecting left
I69.152	dominant side
	Hemiplegia and hemiparesis following nontraumatic intracerebral hemorrhage affecting right
I69.153	non-dominant side
	Hemiplegia and hemiparesis following nontraumatic intracerebral hemorrhage affecting left
I69.154	non-dominant side
	Hemiplegia and hemiparesis following nontraumatic intracerebral hemorrhage affecting
I69.159	unspecified side
	Monoplegia of upper limb following other nontraumatic intracranial hemorrhage affecting right
I69.231	dominant side
	Monoplegia of upper limb following other nontraumatic intracranial hemorrhage affecting left
I69.232	dominant side
T00 000	Monoplegia of upper limb following other nontraumatic intracranial hemorrhage affecting right
I69.233	non-dominant side
Tag 22.4	Monoplegia of upper limb following other nontraumatic intracranial hemorrhage affecting left
I69.234	non-dominant side
Tao 000	Monoplegia of upper limb following other nontraumatic intracranial hemorrhage affecting
I69.239	unspecified site
ICO 941	Monoplegia of lower limb following other nontraumatic intracranial hemorrhage affecting right
I69.241	dominant side Manualogia of lawar limb following other nontroperatio intrograpial homographes as affecting left
IGO 949	Monoplegia of lower limb following other nontraumatic intracranial hemorrhage affecting left
I69.242	dominant side Manualogia of lawar limb following other nontroperatio intro grapial homographs as affecting right
IGO 949	Monoplegia of lower limb following other nontraumatic intracranial hemorrhage affecting right
I69.243	non-dominant side Monoplegia of lower limb following other nontraumatic intracranial hemorrhage affecting left
I69.244	non-dominant side
100.244	non dominant side

ICD-10	ICD-10 Description
	Monoplegia of lower limb following other nontraumatic intracranial hemorrhage affecting
I69.249	unspecified site
	Hemiplegia and hemiparesis following other nontraumatic intracranial hemorrhage affecting
I69.251	right dominant side
I69.252	Hemiplegia and hemiparesis following other nontraumatic intracranial hemorrhage affecting left dominant side
103.202	Hemiplegia and hemiparesis following other nontraumatic intracranial hemorrhage affecting
I69.253	right non-dominant side
I69.254	Hemiplegia and hemiparesis following other nontraumatic intracranial hemorrhage affecting left non-dominant side
I69.259	Hemiplegia and hemiparesis following other nontraumatic intracranial hemorrhage affecting unspecified side
I69.331	Monoplegia of upper limb following cerebral infarction affecting right dominant side
I69.332	Monoplegia of upper limb following cerebral infarction affecting left dominant side
I69.333	Monoplegia of upper limb following cerebral infarction affecting right non-dominant side
I69.334	Monoplegia of upper limb following cerebral infarction affecting left non-dominant side
I69.339	Monoplegia of upper limb following cerebral infarction affecting unspecified site
I69.341	Monoplegia of lower limb following cerebral infarction affecting right dominant side
I69.342	Monoplegia of lower limb following cerebral infarction affecting left dominant side
I69.343	Monoplegia of lower limb following cerebral infarction affecting right non-dominant side
I69.344	Monoplegia of lower limb following cerebral infarction affecting left non-dominant side
I69.349	Monoplegia of lower limb following cerebral infarction affecting unspecified site
I69.351	Hemiplegia and hemiparesis following cerebral infarction affecting right dominant side
I69.352	Hemiplegia and hemiparesis following cerebral infarction affecting left dominant side
I69.353	Hemiplegia and hemiparesis following cerebral infarction affecting right non-dominant side
I69.354	Hemiplegia and hemiparesis following cerebral infarction affecting left non-dominant side
I69.359	Hemiplegia and hemiparesis following cerebral infarction affecting unspecified side
I69.831	Monoplegia of upper limb following other cerebrovascular disease affecting right dominant side
I69.832	Monoplegia of upper limb following other cerebrovascular disease affecting left dominant side
100.002	Monoplegia of upper limb following other cerebrovascular disease affecting right non-dominant

Dual coding requirements:

• Primary G and M codes require a secondary G or I code in order to be payable

Appendix 2 – Centers for Medicare and Medicaid Services (CMS)

Medicare coverage for outpatient (Part B) drugs is outlined in the Medicare Benefit Policy Manual (Pub. 100-2), Chapter 15, §50 Drugs and Biologicals. In addition, National Coverage Determination (NCD), Local Coverage Determinations (LCDs), and Local Coverage Articles (LCAs) may exist and compliance with these policies is required where applicable. They can be found at: http://www.cms.gov/medicare-coverage-database/search/advanced-search.aspx. Additional indications may be covered at the discretion of the health plan.
